

Collaboration

The Lake Pend Oreille School District recognizes that a successful partnership between staff and administration is a trait of high performing school districts. To that end, staff and administration will seek opportunities to involve stakeholders in decisions that affect student performance and work environment.

At school sites, Leadership Teams will function as the primary means of collaboration. Teams are expected to meet monthly, or more often as determined by school needs. The primary focuses are improved student achievement and a positive work environment. As such, all members are expected to play a leadership role in interpreting student performance data, determining appropriate school goals based upon student and staff needs, scheduling, and selecting appropriate professional development. Input will be regularly sought from the entire staff.

Leadership Teams will share meeting agendas in advance with all staff. Minutes of each meeting will be shared in building and with district administration.
